Why save water?

Fresh water is a finite resource. The more litres we flush down the toilet, the more litres we have to treat in the wastewater treatment plants. This costs us all in the long run. If we all save a little now, we'll save a lot later.

Average water consumption for a typical home in Beaumont is 20,000 litres per month, of this about 7,000 litres is used for flushing toilets. By participating in this program you will reduce that volume by 50% (3,500 litres)...

Did you know?

- ✓ 3,500 litres of water would fill 2 pickup truck boxes;
- ✓ 3,500 litres of water is more than enough to irrigate all lawns within an average size yard once a week for an optimal period of one hour!
