height shall require separate permits and shall meet the minimum setback requirements for the Conventional Neighbourhood District (CN).

7. The Accessory Building shall be constructed with exterior finish materials that complement the Principal Dwelling.
8. Provide adequate surface drainage, ensuring positive drainage away from building foundation and ensuring no water runs onto an adjacent property. In all cases, compliance with the City of Beaumont *Surface Drainage Bylaw 1058-25* shall be required.

Additional Information

1. This Notice of Decision is NOT a building permit. Work or construction shall not commence until an applicable Building Permit has been issued under the *National Building Code – Alberta Edition 2023*, and any other applicable bylaws or regulations.
2. This Development Permit is issued under the City of Beaumont *Land Use Bylaw 944-19*. It does not exempt you from compliance with any other municipal bylaw or statutory plan applicable to the Proposed Development, any relevant federal or provincial statute or regulation, or any easement, covenant, agreement, or contract affecting the subject lands.
3. Contact *Alberta One Call* at 1-800-242-3447 to locate underground services prior to construction, if applicable.
4. A 6% driveway slope is considered ideal; this plan shows average slopes of 22.5% to property line and 12.3% to Lane.

If your plan shows a steep slope on the driveway, the owner may experience difficulty opening car doors, or parking on the surface when it is icy. You may wish to adjust the garage floor elevation to decrease the driveway slope.

If your plan shows a very shallow slope on the driveway, during a heavy snow melt or heavy and prolonged rain, the owner may experience water draining back into the garage and landscaped areas that have been constructed low relative to the street. You may wish to adjust the garage floor elevation to increase the driveway slope.
